PROFESSIONAL SUMMARY

Associate QA Specialist with 8+ years of hands-on experience driving Quality Assurance across Web, Mobile, Native apps, Backend, and API testing within Agile environments. Proven track record in cross-platform testing, backend validation, bet settlement logic, release management, continuous integration pipelines, and end-to-end (E2E) regression testing for high-traffic applications. Skilled in Postman, Jira, Azure DevOps, TestRail, Testmo, GitLab, SQL, Android Studio, Kibana, Sentry, and BrowserStack. Adept at leveraging AI tools to accelerate QA productivity, with foundational automated script writing experience in Playwright.

CORE COMPETENCIES & TECHNICAL SKILLS

- **Domain Knowledge:** Sportsbook & Casino Systems, Bet Settlement & Odds Validation, Payment Gateways & iFrames, Real-Time Data Stream Testing. Event & Venue Management Systems (Ticketing, Facility & Space Booking, Leisure & Activity Management).
- **Testing & QA:** API Testing, Functional & Regression Testing, E2E Testing, Mobile QA (Android & Flutter), Backend testing, Usability & Performance Testing
- **Tools & Platforms:** Postman, BrowserStack, Chrome DevTools, Android Studio, Kibana, Sentry, IIS, CMS, Backoffice Tools, iCore
- **Test & Defect Management:** Jira, TestRail, Testmo, Azure DevOps, TFS, Confluence
- **CI/CD & Version Control:** GitLab, Git, Build Pipelines, CI/CD Integration
- **Databases:** Microsoft SQL Server, Oracle DB, MySQL
- **Automation & Emerging Tech:** Playwright, Appium, AI-Assisted QA Workflows

PROFESSIONAL EXPERIENCE

Associate QA Specialist | Techlabs Global Private (Ltd), Colombo | *Apr 2025 – Present*

- Lead end-to-end QA across multiple Sportsbook and casino brands, validating live odds updates, bet slip mechanics, cash-out functionalities, and bet settlements.
- Lead Flutter, mobile and web testing initiatives across multiple high-traffic projects in Agile environments.
- Lead the QA team by planning, coordinating, and monitoring testing activities to ensure the timely delivery of high-quality software.
- Executed backend and API validation for deposit/withdrawal payment flows, wallet transactions, and third-party game provider integrations.
- Perform deep backend QA validation covering core system logic, iframe integrations, payment gateways, and backoffice platforms.
- Conduct parallel cross-platform testing across diverse OS/browser combinations using BrowserStack.

- Perform database validation and utilize Kibana and Sentry for real-time log monitoring and root cause analysis.
- Author and maintain standardized manual test case suites used across the QA team using Testmo/TestRail.
- Integrated automated testing into GitLab CI/CD pipelines to improve release quality and reduce deployment risks.
- Managed the release process and prepared release notes for production deployments.
- Provided release sign-off and performed post-deployment sanity testing to ensure production readiness.
- Contribute to automated regression suites by writing entry-level test scripts using Playwright.
- Conducted feature demos for cross-functional teams
- Incorporate AI-based tools into daily testing workflows to improve efficiency and test coverage.

Senior QA Engineer | Techlabs Global Private (Ltd), Colombo | *Jan 2022 – Mar 2025*

- Managed end-to-end web, mobile and Flutter QA processes for high-volume betting application brands.
- Authored comprehensive test plans and managed defect lifecycles using Jira and GitLab build pipelines.
- Mentored junior QA engineers, facilitating knowledge sharing and establishing software quality best practices.
- Collaborated with developers, product owners, and business analysts to resolve critical issues early in the SDLC.
- Continue support for the releases, regression, and sanity testing.

Senior QA Engineer | Syntros Ltd, UK (Remote) | *Aug 2021 – Dec 2021*

- Served as Team Lead for the API QA Team, overseeing resource allocation, task distribution, and test case reviews.
- Executed frontend and integration testing for the OPTIMO V4 web application with rigorous API validation via Postman.
- Managed third-party API integrations, deployment calls, release notes, and QA certifications.
- Tracked and managed defects in Azure DevOps while driving process improvements to reduce error rates.

QA Engineer | Programus Pvt. Ltd, Colombo | *Feb 2021 – Jul 2021*

- Conducted web application and API testing, verified third-party integrations, and reviewed team test cases.
- Managed build deployments to test environments and tracked defects using Azure DevOps.
- Prepared release notes and QA certification documents for production readiness.

Associate QA Engineer | Programus Lanka Pvt. Ltd, Colombo | *Dec 2018 – Jan 2021*

- Executed API testing using Postman and performed regression, smoke, and functional testing on web applications.
- Analyzed software requirements to build detailed test plans and test case suites.
- Identified, logged, and tracked defects using Azure DevOps and TFS.

Trainee QA Engineer (Intern) | Programus Lanka Pvt. Ltd, Colombo | *May 2018 – Nov 2018*

- Participated in Agile Scrum ceremonies and supported test case design based on functional requirements.
- Create test cases and test plan based on requirements.
- Testing APIs to certify the requirements.
- Identify defects and track them to retest.
- Tested core APIs and logged defects using Team Foundation Server (TFS).

CERTIFICATIONS

- **ISTQB Certified Tester – Foundation Level (CTFL)**

EDUCATION

- **Master of Science: Information Technology** – Cardiff Metropolitan University (Grade: Merit) | *Nov 2019 – Feb 2022*
- **Bachelor of Science: Software Engineering** – Cardiff Metropolitan University (2nd Class Division One) | *Apr 2014 – Oct 2017*
